Admissibility and evidential weight of data messages

Production of document or information

17. (1) Subject to [section 28](#), where a law requires a [person](#) to produce a document or information, that requirement is met if the [person](#) produces, by means of a [data message](#), an electronic form of that document or information, and if—
- (a) considering all the relevant circumstances at the time that the [data message](#) was sent, the method of generating the electronic form of that document provided a reliable means of assuring the maintenance of the integrity of the information contained in that document; and
 - (b) at the time the [data message](#) was sent, it was reasonable to expect that the information contained therein would be readily accessible so as to be usable for subsequent reference.
- (2) For the purposes of subsection (1), the integrity of the information contained in a document is maintained if the information has remained complete and unaltered, except for—
